It is argued that as the sixteen mil-Erie stock was worth in London at the last price hirty-two per cent) only five millions of dollars, and the twenty millions of Onio and Mississippi certificates only two millions of dollars, making seven millions in all, that two-thirds of this, giving controlling power over both roads, could be purchased for \$4,600,666, or less than a million of pounds sterling. This, it is ob-served, would give to English capital control of a line of road extending from New York to St. Louis; but we may reasonably ask what would be the object of such controls.

A vague belief in the possibility of Sherman's march sing interrupted by a rebel assault has operated against cline; but, as there is nothing in reality to put the arket up, the "bulls" in the gold room have and hard work to advance the premium. same time gold is firmly held by both private and culative parties, and notwithstanding the decided besses we have achieved the tendency of speculation l be towards higher rates until the termination of the ar appears more definitely in view.
